ⁱ 'When is this evaluated' is indicative but may be carried out at any time throughout the selection process.

ⁱⁱ Time of appointment refers to the date at which the post commences

ⁱⁱⁱ The GMC introduced the licence to practise in 2009. Any doctor wishing to practise in the UK after this date must be both registered with and hold a licence to practise from the GMC at time of appointment.

^{iv} 'Intended start date' refers to the date at which the post commences, not (necessarily) the time an offer is accepted.

^v 'Selection centre' refers to a process, not a place. It involves a number of selection activities which may be delivered within the unit of application.

^{vi} Applicants are advised to visit the GMC website which gives details of evidence accepted for registration.

^{vii} The Support for Application to another region form, signed by the Training Programme Director of their current Specialty Training Programme confirming satisfactory progress must be submitted to the recruitment office at time of application.

^{viii} Exceptional circumstances may be defined as a demonstrated change in circumstances, which can be shown on the ability to train at that time and may include severe personal illness or family caring responsibility incompatible with continuing to train. Applicants will only be considered if they provide a 'support for reapplication to a specialty training programme' form signed by both the Training Programme Director / Head of School and the Postgraduate Dean in the LETB / Deanery that the training took place. No other evidence will be accepted.

^{ix} Any time periods specified in this person specification refer to full time employment

^x Non-training posts will be recognised, where evidence is available of competences achieved equivalent to training posts. Recognition of non-training posts will lead to a Certificate of Eligibility for Specialist Registration – Combined Programme rather than a Certificate of Completion of Training

^{xi} ACCS CT1 and CT2 specialties are Emergency Medicine, Acute Internal Medicine, Anaesthetics & Intensive Care Medicine

^{xii} Competences as defined in the ACCS curriculum (http://www.gmc-uk.org/ACCSCurriculum_April2012.pdf_48572157.pdf_56514255.pdf)
